Carolina Forner

Jr Full-Stack Developer

E X P E R I E N C E

Full-Stack Teaching Assistant

Jul 2022 - Nov 2022

Work at Minimalart - Frontend Developer

November 2022 - Present

P R O J E C T S

Videogame App

https://videogames-client-six.vercel.app/

Full-Stack application developed with React/Redux and ExpressJS with its own database that uses an external API to obtain video games information, rawg.io.

Jumping Rabbits

https://jumping-rabbits.vercel.app/

This was my first project using HTML5, CSS3 and advanced animations. I learned how to use keyframes to create simple animations and about microinteractions between DOM elements and their styles when making changes to their state through events.

Pokedex

https://poke-api-challenge.vercel.app/

Frontend application developed with React/Redux-toolkit and uses an external API to obtain Pokemon information, pokeapi.co.

Check List

https://check-list-theta.vercel.app/

https://todo-list-caroo334.vercel.app/

I've created a beautiful to-do list app using ReactJS and JavaScript. I learned how to pass properties between components, how to use events to connect child components to their parents, and how to bind styles directly to my components.

ConcatUs App

https://concatus.vercel.app/

Full-Stack application developed using React/Redux and MaterialUI into Frontend and ExpressJS, Moongose, Firebase and TypeScript into Backend.
